OCTOPUS IP

RFID Multipurpose solution

This liquor control device is the most complete single station solution available today bar none. The basic out of the box version allows the RFID application to monitor 256 different specific brands of liquor and four programmable portions per brand.

Eight possible price or portion changes daily. Programmable features such as start-up, shutdown, reboot etc. As part of the complete management system the Octopus also manages draft beer in both flow meter or automatic portion heads. This unit can have up to 16 servers getting individual reports. Communication options are complete (including Ethernet). Four additional ports are available to link to soda and liquor guns (Bevcon). Additional beer lines available.
